ProFix
IMMOBILISING SPLINT

Wrist relief thanks to multifunctional immobilising splint

Permanent catheters and infusions can lead to painful tension in the patients' wrists. ProFix provides effective relief thanks to the **painless immobilisation of the wrist for arterial catheters or peripheral infusions**.

A hand splint padded with skin-friendly foam contributes to added patient comfort. Besides the ProFix Standard splint, the ProFix Extra splint with a reinforced aluminium core was developed especially for active or stronger patients.

Order options

Product	Shipping unit	Order No.
Standard - single, blue 22 cm long | 9 cm wide	25 pieces	HSOPF22
Extra - single, blue 22 cm long | 9 cm wide	25 pieces	HSOPF22H

HOW TO USE

1 **Placement & positioning of the splint**

TIP

Place the splint as required on the inside or outside of the arm. If needed, bend the splint into the desired position before use.

2 **Placement of the straps**

TIP

Guide the elastic straps around the arm.

3 **Placement & positioning of the splint**

TIP

Close the straps using the Velcro fasteners. The straps should not be too tight to ensure optimal circulation.
