HOSPITAL SUPPLY ORGANISATION

FLEXIBLE HEEL PROTECTION
FOR THE PREVENTION
OF DECUBITUS ULCERS

LEG-SUPPORT FOR QUICK HEALING

HeelFix
FLEXIBLE HEEL PROTECTION

Comfort and support

HeelFix provides effective support for the lower extremities as well as preventive relief of pressure points to minimise the risk of decubitus ulcers and increase patient comfort. The positioning aid can also be used directly in the operating room during plastic surgery procedures. HeelFix is a one-part heel protector made of skin-friendly foam and can be used in all areas of patient positioning.

A Velcro fastening system makes it easy to position the foot without unnecessarily restricting the patient's movement. Thanks to its simple and intuitive handling, HeelFix can be applied quickly and easily. The product can be reused up to three times by washing it at 60°C.

Order options

Product	Shipping unit	Order-No.
Single, yellow	25 pieces	HSO08
