

SafeFix

**HSO**<sup>®</sup>  
HOSPITAL SUPPLY ORGANISATION

HAND AND FINGER  
RESTRAINT

**SAFE  
AND  
PRO-  
TECTED**

# One product, three variants, countless uses

Mobility-impaired patients and patients with uncontrolled movements present a daily challenge for nursing staff and physiotherapists.

SafeFix **prevents the manipulation** of infusions, catheters, drains or life-sustaining equipment for the patient's own safety. **Hands and fingers** are protected in a mitt-like glove. At the same time, SafeFix Light not only protects the patient but can also be used to keep the hands **warm**.

## Instruction of use

The use of SafeFix without the HSO FixBand is not considered freedom-restricting in legal terms. As a standard, all SafeFix variants are delivered with FixBand. The restraining strap can also be ordered separately.

Product	Shipping unit	Order No.
FixBand	100 pieces	HSOFIXBAND6000

## SafeFix Child X-SMALL | SMALL | MEDIUM

Babies and small children are especially at risk of injury from uncontrolled movements resulting in the pulling out of infusions, catheters, etc. Moreover, an accurate fit is very important for the effective and comfortable restraint. SafeFix Child is therefore available in three different sizes.

## Order options

Product	Hand length	Shipping unit	Order No.
SafeFix Child XS	9 cm	10 pieces	HSOSAFIX1000
SafeFix Child S	10 cm	10 pieces	HSOSAFIX2000
SafeFix Child M	14 cm	10 pieces	HSOSAFIX3000

## SafeFix

MEDIUM | LARGE

SafeFix is available in two sizes: M and L. The gently padded hand and finger restraint is suitable for patients of all ages. In combination with the HSO FixBand restraining strap, SafeFix offers additional protection for your patients by limiting patient movements if necessary.

### Order options

Product	Hand length	Shipping unit	Order No.
SafeFix M	15 cm	10 pieces	HSOSAFIX4000
SafeFix L	18 cm	10 pieces	HSOSAFIX5000

## SafeFix Light

ONE SIZE

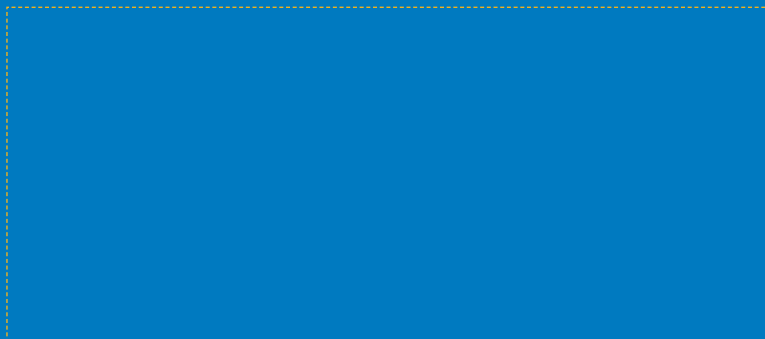

Securing the hands often places limitations on the work of the caregiving staff. Moreover, it is often difficult to keep the hands warm. SafeFix Light answers both of these problems in one product. The SafeFix system prevents the manipulation of infusions, etc., while a flap at the fingertips makes it possible to measure vital parameters. The double padding helps to maintain the body temperature in the hands and fingers.

### Order options

Product	Hand length	Shipping unit	Order No.
SafeFix Light	18 cm	10 pieces	HSOSAFIX5000L
